# Message

**YB Datuk Hajah Jainab Datuk Seri Panglima Haji Ahmad Ayid**  
Minister of Community Development and Consumer Affairs Sabah

I wish to extend my heartfelt congratulations to the S.O.S. Heart fund for Celebrating their 36th Anniversary Cum Fund Raising Charity Dinner and I felt honoured to be given the opportunity to write a short message in the souvenir program.

Congratulations again for your success over the years which has not come easy but much sacrifice, love, passion, perseverance has been put in over the past 36 years and I wish you all an even better successful years ahead!

My heart goes out to all the mothers of the children who had undergone Corrective Heart Surgeries. You are the heroes! You have shown so much of your bravery sacrificial love and a hope that your children will too live a normal life after the surgery. A "Hope" not without fear, but your love has shown it all. You are there by your child side, day and night throughout the ordeal. Together with those who have made this possible, I join with you all tonight in this "hope" and challenges for each of these children who has a bright future ahead of them.

It is also my wish to see more patients to be operated here locally in Sabah with the Heart Centre which has been established since 2010 and private Medical Centre opening here and I too hope more expertise and team and advance equipments would be added to the service for the people here in Sabah, so patients can seek help locally where they could have the family support.

I also wish to say thank you to all the volunteers in the SOSHF who has been there - and giving their support, their time and sacrifice by sharing their love and their care to the patients relentlessly by caring, standing by their side, sending off and welcoming them back at very odd hours at times. I thank you all!.

I wish to assure you of my Ministry sincere continue support to the SOSHF towards your noble cause in your endeavor to bring smile back to the less fortunate children so they can live a normal life and grow up normally like other children.

Syabas!

(YB DATUK HAJAH JAINAB DATUK SERI PANGLIMA HAJI AHMAD AYID)

**Datuk Christine Vanhouten**  
President  
S.O.S Heart Fund

Warmest Greetings.

It is indeed my privilege and honor to welcome all our guests and supporters tonight to this 36th. Anniversary Celebration to commemorate the founding of the SOS Heart Fund.

Our very special thanks to our Patron, the Tuan Yang Terutama Yang Di-Pertua Negeri Sabah, Tun Datuk Seri Panglima (Dr) Haji Juhar Bin Datuk Haji Mahiruddin for his gracious presence to lend recognition and prestige to this memorable evening.

The SOS Heart Fund has since its formation in 1981 achieved so much in terms of fulfilling its stated objectives. This achievement have given 636 heart patients, as of 30th. June, 2017, a new lease of life and this effort was by no means an easy task. It has taken a lot of the members time and efforts to plan and work as a team, to implement the various aspects of our duties as volunteers and charitable workers to realize the SOS Heart Fund intended focus.

In conjunction with this auspicious occasion of the SOS Heart Fund 36th. Year Anniversary, I would like to record my appreciation and heartfelt thanks to the SOS Heart Fund Executive Committee, Doctors and all Members of the Society. Their commitment and dedication through the years in ensuring that the important work of the Society in helping the less fortunate was carried out efficiently and with much care from their own generous and loving hearts is outstanding.

I would also like to record my gratitude to the State Government and the generous public for their financial assistance that has provided the SOS Heart Fund the means to carry out our charitable work for the benefits of those financially disadvantaged members of our Community.

This 36th Year Anniversary gives a sense of pride and achievement for us in the SOS Heart Fund. We are proud to be part of the contributors to the State's efforts towards a more caring society. We are also blessed with the satisfaction that through our work within the SOS Heart Fund, many heart patients especially children are now living a normal life.

Wishing all the best of health always.

*"Caring With A Heart"*

Sincerely

A handwritten signature in black ink that reads "Christine Vanhouten". The signature is written in a cursive, flowing style.

**Datuk Eva Susau**  
Organizing Chairman / Hon. Secretary  
S.O.S Heart Fund

A very warm welcome to our Guest of Honour, Tuan Yang Terutama Tun Datuk Seri Panglima (Dr) Haji Juhar Bin Datuk Haji Mahiruddin and all guests and friends of the S.O.S Heart Fund to our 36<sup>th</sup> Anniversary Cum Fund Raising Charity Dinner with the theme *"Love Your Heart, Keep It Healthy!"*.

We are very pleased to inform you that the Society has lived up to its objective and it has been relevant and sustainable throughout these years and the Society will continue to do its role to serve the community in sending more young patients for Corrective Heart Surgeries if more funds are coming in. The Society has also expanded its role to promote awareness in caring for our heart.

Apart from the Kota Kinabalu Heart Week campaign which is carried out almost yearly, the support group for our ex-patients; anti-smoking campaign; CPR training; and the Go Red For Women which advocates for women and heart health will also be part of the SOSHF programs. More activities will be carried out to bring awareness in caring for our heart as the society moves forward as better and more advance medical support is made available locally in Sabah at both Government hospital and private medical centre.

Over 636 patients has benefited from the Society since its inception in 1981. The Society looks forward to better years ahead!

The SOSHF also welcome other NGO's and corporate company to jointly organize charitable events with the Society to help raise funds for the society. This evening could not be complete without saying a big 'Thank You' to the following people: The State Government of Sabah; The Seong-An Heart Foundation, Korea; The Gleneagles Kuala Lumpur; Sejong General Hospital, Korea; Gleneagles Kota Kinabalu; The KFHI in Malaysia; Lions Club of KK Host, and all donors who has contributed generously in one way or another over the years. 'Thank You!'

As no big thing is accomplished by one person alone, I now wish to thank all my organizing committee for the hardwork in making tonight's event a success. Special thanks goes to all generous individual and corporate companies who has supported in tonight's event for being here with us, all donors, guests, all advertisers, the press and everyone who has contributed in one way or another in making this event a success, for without you this event will not be the same.

Last but not least I wish to take this opportunity to wish you all a happy and enjoyable evening and best of health in the future!

*"Caring With A Heart"*

## *Sejarah*

Persatuan Tabung Pesakit Jantung Sabah telah ditubuhkan pada tahun 1981 oleh Menteri Pembangunan Masyarakat Sabah pada masa itu, iaitu Toh Puan Hajjah Rahimah Stephens yang juga sebagai pengasas Presidennya.

Persatuan ini secara rasmiya telah didaftarkan dan dilancarkan oleh Yang Dipertua Negeri Sabah pada masa itu, iaitu Tun Adnan Robert pada bulan Ogos 1981.

## *Objektif*

Objektif Persatuan Tabung Pesakit Jantung Sabah adalah membantu pesakit jantung kanak-kanak yang tidak berkemampuan untuk menjalani rawatan/pembedahan di Kuala Lumpur. Kos rawatan untuk seorang pesakit dianggarkan dalam lingkungan RM35,000.00-RM45,000.00.

Memandangkan senarai pesakit yang memerlukan rawatan/pembedahan yang semakin bertambah, maka persatuan hanya dapat berharap agar lebih banyak sumbangan atau derma diterima untuk memastikan golongan yang kurang berkemampuan ini mendapat peluang kedua bagi menjalani kehidupan yang lebih baik lagi. Persatuan hanya bergantung kepada bantuan masyarakat dan kerajaan bagi meneruskan objektif dan tujuannya.

Sehingga kini, Persatuan Tabung Pesakit Jantung Sabah telah membiayai seramai 636 pesakit jantung semenjak penubuhannya pada tahun 1981. Sejak beberapa tahun yang lalu, kebanyakan pesakit telah dihantar ke Institut Jantung Negara, Gleneagles Kuala Lumpur dan juga ke Korea hasil kerjasama dengan sukarelawan Korea serta Korea Food For The Hungry International.

Semenjak penubuhan persatuan ini 36 tahun yang lalu, ia merupakan salah satu pertubuhan amal/ sukarela yang tidak mempunyai tenaga kerja sepenuh masa. Maka itu, kos pentadbiran atau pengurusan berada pada tahap yang rendah.

Persatuan ini akan meneruskan kutipan derma atau sumbangan agar lebih ramai lagi pesakit jantung yang tidak berkemampuan dapat dibantu bagi mendapatkan rawatan/pembedahan agar mereka mendapat peluang kedua untuk menjalani kehidupan yang lebih baik.

## *Prosedur Yang Dirujuk Untuk Pembiayaan*

### **a) Pemeriksaan Rawatan**

Seseorang pesakit akan dirujuk kepada konsultan/doktor persatuan di Hospital Wanita dan Kanak-kanak, Likas Kota Kinabalu. Doktor berkenaan akan memeriksa pesakit dan pada masa yang sama akan memutuskan samada rawatan selanjutnya atau pembedahan diperlukan.

### **b) Penaksiran Kewangan**

Semasa perakuan atau rekomen untuk pembedahan, kes itu akan dirujuk untuk penaksiran kewangan oleh pegawai unit sosial di Unit Kebajikan Hospital Likas, Kota Kinabalu.

### **c) Pertimbangan untuk permohonan**

Laporan yang mengandungi maklumat penuh peribadi pesakit, penaksiran kewangan dan keadaan rawatan akan dimajukan kepada ahli jawatankuasa persatuan untuk pertimbangan.

### **d) Pemindahan/penyerahan kes yang telah diluluskan**

Kes-kes yang telah diluluskan untuk pembiayaan akan dihantar ke hospital tertentu untuk pembedahan. Urusan perjalanan akan dibuat oleh petugas sosial.

### **e) Elaun untuk pengiring pesakit**

Pengiring pesakit (kebanyakan untuk kanak-kanak di bawah umur 12 tahun) sekiranya perlu, kemungkinan akan dipertimbangkan untuk tempat tinggal dan elaun makan.

### **f) Elaun perjalanan untuk pesakit jantung**

Persatuan juga akan mempertimbangkan permohonan untuk elaun perjalanan pesakit jantung.

## *Rheumatic Heart Disease In Sabah*

**Dr. Llew Houng Bang**

Rheumatic heart disease (RHD) is a chronic heart condition caused by rheumatic fever. It can be easily prevented and controlled by treating streptococcal infection with antibiotics. However, this action is often lacking in low and middle income countries, making RHD the most commonly acquired heart disease in children in many countries of the world. The World Heart Federation has made RHD one of its five strategic focus areas to raise awareness about this easily preventable disease.

Although acute rheumatic fever at presentation may not be as common in Malaysia as compared to other countries, there are still many patients who are suffering from its sequelae. These people have increased mortality and morbidity especially those with severe valvular defects complicated by cardiac failure and atrial fibrillation. Infective endocarditis is a real problem if it occurs in these patients.

What can we do to reduce the incidence of this disease? Eradicating group A beta 122 haemolytic streptococcus pharyngitis would be ideal, but it would not be easy, unless a vaccine can be developed. This is more worried as group A streptococcus strains is very prevalent. Fortunately, group A streptococcus remained susceptible to penicillin. The next step then would be to make penicillin easily available to children who are suspected to have streptococcal pharyngitis and treat them adequately. Evidence from the Philippines even went to the extent of suggesting that by giving penicillin to school children with pharyngitis (prior to confirmation of its aetiology), the attack rate of rheumatic fever can be reduced by ten fold. Secondary prophylaxis is another area where we can all improve on. It is important to make penicillin easily available to this group of patients.

In Malaysia, there is no source of comprehensive, systematic information on the prevalence of RHD, although it remains a problem in some areas of the country. Queen Elizabeth II Hospital in Kota Kinabalu established a small-scale hospital-based registry since 2010 to gather information on RHD that can guide health service planning and patient follow-up. Based on our audit year 2013, sixty-two percent received secondary antibiotic prophylaxis: 44.7% prescribed IM Benzathine Penicillin (IM Ben Pen) while 17.0% prescribed oral Penicillin V. It shows good progression as 87% on secondary prophylaxis and 76% of our patients prescribed IM Benzathine Penicillin (IM Ben Pen).

Based on our experience, most of patients are female and majority of them are in reproductive group. What we lacking here, family planning in Sabah still have room of improvement. Based on our audit year 2013, 55.6% was given education on family planning, however only 25.9% had formal referral to family planning services.

The importance of maintaining good oral health and routine dental care is important to reduce the prevalence of disease. Patients with rheumatic heart disease have a higher risk of endocarditis. It can be life threatening.

**Again prevention is better than cure. Do something before it too late!**

## *Congenital Heart Disease In Sabah*

**Dr. Silva Rao**

Congenital heart disease is the most common birth defect, affecting 1 in 100 children worldwide. With more than 500,000 deliveries in the last year alone, we estimate that around 5000 children in Malaysia were born with a congenital heart defect. While only half will eventually need some form of intervention, be it via transcatheter maneuvers or surgical correction, this still represents a significant burden on our health care system. A prospective study involving 4 major hospitals across Malaysia in the year 2000 concluded that access to surgical treatment of paediatric cardiac cases were inadequate and noted a huge backlog of patients requiring some form of intervention. The Health Ministry over the last three decades has overseen the rapid development of cardiac services as well as availability of paediatric cardiologist and paediatric cardiac surgeons. This has improved paediatric cardiac care as a whole but by no means has it solved the problem entirely.

Sabah is blessed with beautiful beaches and majestic mountain ranges. This extreme geographical terrain coupled with the fact that almost 60% of its inhabitants are rural dwellers poses a huge challenge to the health care provider. With over 60,000 births a year in Sabah alone, it is a given that congenital heart disease remains a conundrum, both in terms of treatment of the patient and logistical issues afflicting the family.

The Society of Sabah Heart Fund (SOSHF) was set up in 1981 with the aim of providing financial aid for underprivileged Sabahans who require cardiac surgery/intervention outside the state. Over the years, SOSHF has worked closely with the state/federal government as well as NGOs and private donors in managing and raising funds. It has collaborated with local private hospitals (Gleneagles Kuala Lumpur) as well as leading Cardiac Centers abroad (Buncheon Sejon Hospital - South Korea). To date they have assisted the lives of over 600 Sabahans with heart disease, with the majority of them children. I have seen first hand how priceless these contributions are to these children and I applaud the hard work and perseverance shown by the committee members year after year. I end by pleading to the public and state government to continue supporting SOSHF in their endeavour for the benefit of our dear children.

**Well done SOSHF!!**

**“There is no exercise better for the heart than reaching down and lifting people up!”**

### **About Heart Disease in Women**

The more a woman knows about heart disease, the better chance she has of beating it. The first facts you need to know are very serious: Heart disease and stroke cause 1 in 3 deaths among women each year more than all cancers combined according to the American Heart Association. Fortunately, we can change that because 80 percent of cardiac and stroke events may be prevented with education and action.

Go Red For Women inspires women to make lifestyle changes, mobilize communities and shape policies to save lives.

### **Heart Disease In Women Can Be Different Than Men's**

Heart attack symptoms in women can be different than what men experience. Chest pain is often not a symptom for women, but jaw pain can be.

Therefore, take action today about your risk for heart disease and stroke.

#### **• Treat obesity as a disease, not just a “lifestyle issue”**

Obesity should be managed and treated like a disease, according to a new cardiovascular prevention guideline .

#### **• Eat fewer calories, exercise more, change unhealthy behaviors**

A three-pronged approach: Eat fewer calories than your body needs, exercise more and change unhealthy behaviors.

**Weight-loss helps reduce health risks more than previously thought.**

### **New Diet, Exercise Guideline for Heart Health**

#### **• Exercise 40 minutes three to four times a week**

Just 40 minutes of moderate to vigorous aerobic exercise three to four times a week was also found to be sufficient for most people. Even brisk walking will do.

The new recommendations are designed for people who need to lower cholesterol and blood pressure.

#### **• More leisure-time exercise, less blood pressure risk**

People who exercised more than four hours per week in their leisure time had a 19 percent lower risk of high blood pressure than those who exercised less than one hour per week. People who had one to three hours per week of leisure exercise had an 11 percent lower risk than those with under an hour of activity.

“To try to lower your risk of high blood pressure, you should exercise more in your leisure time.”

# MY STORY

## Vennielson

Date of Birth : 7th August 2015      Address : Keningau  
 Operated : 25th January 2016  
 Diagnosis : Large PMVSD & Small 2° ASD

7th August 2015, a lovely boy named, Vennielson was born in a village at Kg. Bunang Laut, Sook Keningau. Vennielson lives with a big family of 16 people including his mother and a brother. His mother being a single parent, lives on monthly contributions from their family members as she is not working but has to look after him and his brother.

At one month old, Vennielson was brought to see the doctor, the mother was devastated with sadness running over her face, feeling helpless and don't know what to do when she knew that Vennielson was confirmed having a small hole (Large PMVSD and Small Secondary ASD) in his heart. Doctor then prescribed a syrup medication to control it from getting worse and monitor the disease.

At the 3rd month on 6th November 2015, the mother found that Vennielson mouth started to turn blue and was rushed to the Hospital and admitted for 2 weeks at Keningau Hospital on 6th November 2015.

On 27th November 2015, Vennielson was admitted for the second time at Keningau Hospital as he continued to get more bluish due to insufficiency of oxygen. Vennielson has to be fed through a 'Ryles tube' so that he will not get too tired from lactating.

On 4th December 2015, Vennielson was being transferred to Queen Elizabeth Hospital II where the Doctor decided to refer his case to the Society For The Sabah Heart Fund for sponsorship for immediate Heart

Surgeries outside of Sabah. He was first scheduled for an appointment at Gleneagles Kuala Lumpur (GKL) on 5th January 2016 but it was differed until the 20th January 2016 because the doctor need to stabilized him as he has contracted fever. The Honorary Secretary of the SOSHF, Datuk Eva Susau came and visited Vennielson before they travel to KL. She also brought the sponsorship letter and gave an allowance of Rm300.

Vennielson was successfully operated on 25th January 2016 at Gleneagles KL and returned home to Kota Kinabalu on 3rd February 2016.

• Vennielson at Gleneagles Kuala Lumpur

• Vennielson at Likas Women & Children Hospital with Datuk Eva Susau (left) and his mother

## MY STORY

### Muhammad Ayyie Ashraf

Date of Birth : 4th December 2015      Address : Tawau  
 Operated : 27th February 2016  
 Diagnosis : Large PMVSD, Small ASD

Muhammad Ayyie Ashraf (2 Months Old) is the only child in his family. He live at Felda Kalabakan Selatan, Tawau with his parents. The mother is a housewife while the father works as a foreman and only earned about RM1,400 a month.

He was then diagnosed with Large PMVSD and Small ASD since he was born on 4th December 2015 after a normal checkup at Hospital Tawau. The father was worried because MuhammadAyyie has lost his body weight due to not sucking well. The parents also felt very sad and discourage after knowing that their son got a hole in the heart and have to undergo surgery.

His Father Mohd. Sabri, was overwhelmed with gladness to hear that the S.O.S Heart Fund will sponsor for the cost of surgeries to KL for corrective heart surgery and thanked the S.O.S Heart Fund for the kind support.

Muhammad Ayyie was successfully operated on 27th February 2016 at Gleneagles KL and returned home to Kota Kinabalu on 9th March 2016.

### Mohd Farish Adly

Date of Birth : 31st May 2013      Address : Kota Kinabalu  
 Operated : June 2016  
 Diagnosis : VSD

Mohd Ridzwan Syah, 33, was accompanying his three years old son, Mohd Farish Adly, for the trip to South Korea.

"He tires easily these days...I was told by the doctor that he needed to undergo corrective heart surgery before he reaches six years old," he said.

He added that he found the cost of corrective heart surgery quite steep and that he could not afford it.

"When I heard about this project, I applied for it immediately. After more than a year of waiting, we are finally going for the surgery" he said.

He thanked all especially to the Society for the Sabah Heart Fund for the sponsorship.

— Jenne Lajiun (June 2016)

# MY STORY

## Sherryinnie Allnie Shermon

Date of Birth : 9th December 2016      Address : Penampang  
 Operated : 28th March 2017  
 Diagnosis : Anomalous Right Pulmonary Artery from Aorta in Failure

Saya Marnie, ibu kepada Sherryinnie Allnie Shermon dan kami berasal dari Papar Sabah. Sejak anak saya berumur 2 bulan, berat badannya tidak meningkat sehinggalah dia berumur 3 bulan, saya dengan segera membawa dia ke Klinik Kesihatan Penampang untuk berjumpa dengan doktor kerana pada waktu itu dia mengalami selesema dan batuk.

Setelah doktor memeriksanya, doktor memberitahu bahawa terdapat bunyi yang berbeza pada jantung Sherryinnie. Doktor kemudian memeriksa peratus oksigen dalam darahnya di mana bacaan oksigen kurang daripada 96% iaitu 92% dan ke bawah.

Pada hari itu juga (8.3.2017), anak saya telah dihantar ke Hospital Likas dan doktor memeriksa jantung anak saya di mana dia mendapati bahawa jantung anak saya berlubang. Selepas itu, anak saya dipindahkan ke Hospital Queen Elizabeth II pada 10.3.2017 untuk berjumpa dengan Dr. Siva dan beliau memberitahu bahawa Sherryinnie harus dibedah.

Pada 27.3.2017 anak saya dihantar ke Hospital Gleneagles Kuala Lumpur, di mana dia berjaya mendapat tajaan penuh daripada pihak Persatuan Tabung Pesakit Jantung Sabah. Sherryinnie telah berjaya menjalani pembedahan jantung pada 28.3.2017 dan dipindahkan ke wad kanak-kanak selepas 4 hari berada di Unit Rawatan Rapi.

Di kesempatan ini, kami sekeluarga amat bersyukur dan ingin mengucapkan ribuan terima kasih kepada semua pihak yang telah mendoakan kesembuhan anak kami Sherryinnie Allnie, dan kepada doktor dan jururawat yang telah menjaga dan merawat anak kami selama dia berada di hospital.

Selain itu, kami juga ingin mengucapkan terima kasih yang tidak terhingga kepada Persatuan Tabung Pesakit Jantung Sabah yang telah banyak membantu kami dari segi kewangan, tanpa Persatuan ini mungkin anak kami masih menderita penyakit jantung berlubang. Tidak lupa juga kami ingin mengucapkan terima kasih kepada Datuk Eva kerana telah melawat kami di hospital dan memberikan kata-kata dorongan.

Sekian dan terima kasih sekali lagi daripada kami sekeluarga.

— Marnie Dungkis (07/04/2017)

# MY STORY

## Aleeya Adriana

Date of Birth : 2nd June 2010      Address : Papar  
 Operated : 23rd February 2017  
 Diagnosis : VSD

Our daughter, Aleeya Adriana is our first child in our family. She was delivered in about 7 and a half month which is 32 weeks of pregnancy. At first, the doctor said that she was good and well. Several days later, in the hospital for further inspection, doctor found out that she has a hole in her heart. We were shocked and sad. The first child in our life has a hole in her heart. What are we suppose to do. The doctor said that there are possibilities that the hole can close itself during growing up. After she already 6 years old, doctor said that she need to be operated to close the hole and the cost for such operation is very high and expensive.

Suddenly, we received a call from the hospital that there are chances that Aleeya Adriana can be healed. There are donors who is giving such efforts to give children who has this disease for surgery. As you know, we came from village that is far away from the city and work in a low income. We cannot afford so much money to undergo the heart surgery. Thanks to the donors, giving our daughter a second chance to live healthy like other children.

Thank you so much to all donors from many association in Malaysia also in Korea for such donation for our child surgery. Without it, its imposible for us to go for this surgery. Thank you so much also to Sejong General Hospital, Korea and all the doctors for such a good and warm service and also for the successful surgery for our child. We are most grateful and happy to see our children have a healthy heart and healthy life. For the donors, thank you so much and never stop searching other children who have heart disease that need to be cured because they need it. Once again, for the sponsors, Society For The Sabah Heart Fund, Seong-An Heart Foundation, Sejong General Hospital, Korea and Korea Food For The Hungry International (M), thank you so much.

— Aleeya Adriana's parents. (2017)

# MY STORY

## Chong Wei Jun

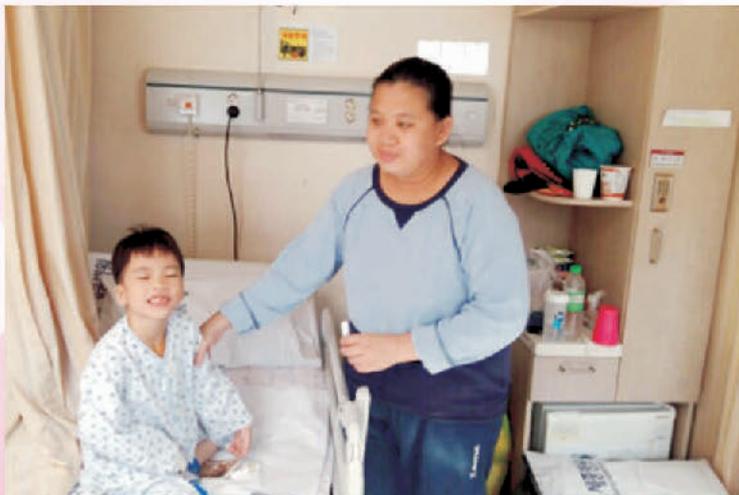

Date of Birth : 25th march 2010      Address : Tawau  
 Operated : 25th February 2017  
 Diagnosis : Moderate VSD with Prolapse RSE

Saya Vung Nyuk Ken, ibu kepada anak saya bernama Chong Wei dan kami berasal dari Tawau. Sejak anak saya dilahirkan, anak s selalu sakit. Apabila saya membawa anak saya ke Klinik Kesihatan Ibu dan Anak, doktor mendapati bunyi jantung anak saya berbeza dengan budak yang normal. Oleh itu doktor memberi surat rujukan untuk membuat pengesahan melalui ujian ECHO di hospital Tawau. Di Hospital Tawau, doktor memberitahu bahawa anak saya menghidapi penyakit jantung berlubang dan bahagian lain pada jantung juga mempunyai masalah. Beliau mencadangkan agar anak kami menjalani pembedahan jantung.

Pada 13/3/16 Dr. Siva dan sekumpulan doktor dari Korea ke hospital likas untuk membuat saringan ujian ECHO dan mereka memberitahu bahawa anak saya mempunyai peluang untuk menjalani pembedahan jantung secara percuma di Korea. Disebabkan suami saya hanya seorang pemandu bas di sebuah syarikat pelancongan, pendapatannya tidak mengizinkan dan kos pembedahan jantung juga agak tinggi. Kami pun bersetuju dengan cadangan Dr. Siva untuk menghantar anak kami ke Korea untuk membuat pembedahan jantung. Anak saya berjaya menjalani pembedahan jantung pada 25/2/17 dan anak saya juga berada dalam keadaan baik di Korea.

Di sini, saya ingin membuat penghargaan dan ribuan terima kasih kepada semua pihak yang telah membantu anak saya. Saya ingin berterima kasih kepada Mrs. Lee yang telah menjaga dan memberi penerangan dalam bahasa melayu semasa berada di Hospital korea dan menjaga kami dengan baik. Selain itu, saya juga ingin berterima kasih kepada Mr. Back dari Seong-An Heart Foundation kerana banyak membantu kami semasa berada di Korea. Saya juga ingin berterima kasih kepada Persatuan Tabung Pesakit Jantung Sabah, Datuk Eva dan Datuk Christine kerana telah membantu dan memberikan sumbangan dan

menguruskan penerbangan kami ke Korea. Selain itu, saya juga ingin berterima kasih kepada Dr. Siva, semua doktor dan jururawat yang terlibat merawat anak saya.

Saya berharap agar cita-cita anak saya untuk menjadi doktor pakar jantung apabila dewasa nanti akan tercapai.

— Chong Wei Jun's parents. (2017)

# MY STORY

## Hazline Malit

Date of Birth : 20th November 1999      Address : Telupid  
 Operated : 29th January 2016  
 Diagnosis : Small DCSA VSD With Mild AR

At 3.00 am dated 27th January 2016 is our flights abroad to Seoul, Korea. At 8.00 am we were touched down at the Korean International Airport and it was my first time abroad for surgery. We continued on our way to the hospital and it was a very cold weather.

After we arrived at Sejong General Hospital, it still makes me worry and fear because it was my first time being far away from my family members and only my father accompanied me. My father accompanied me well and provide me with strength when I need it. My family members also gave me encouragement to not become afraid to undergo the surgery. Before i undergo the surgery, my family members called me to pray and ask me to be strong, despite the fear hit on me, i continued to pray to God and hope that the surgery went smoothly and safely. And I also will not forget Mrs. Lee that gave me encouragement.

I have done my surgery on 29th January 2016. After the surgery was completed, I was in the ICU before being transferred to the ward. I was in a state of unconsciousness. My father and Mrs. Lee visited me at the ICU and I can only hear my father's voice calling my name. And at the same time I prayed to God and thanked God is always with me.

After I've been conscious, I felt very pain at the operated site and it caused me a difficulty in moving. But a few days later the pain began to gradually recover and now I am entirely healthy.

On this occasion, I thank all those who have helped to sponsor the cost of my surgery and special thank to S.O.S Heart Fund for helping me to get to Korea because if it is not the assistance from the S.O.S Heart Fund I will not get the opportunity going to this country and carried out the operation.

Once again I would like to thank to all those who have helped me. I will never forget the kindness that has given to me and only God can repay the goodness.

# MY STORY

## Muhd Nuradib Bin Peter

Date of Birth : 19th July 2012      Address : Nabawan  
 Operated : 22nd February 2017  
 Diagnosis : Moderate VSD with Prolapse RSE

Saya ibu kepada Muhammad Nuradib Bin Peter berasal dari Kg. Bahagia Nabawan Pensiangan, ingin mengucapkan ribuan terima kasih kepada Mrs. Lee dan semua pihak yang terlibat dalam hal-hal ini. Anak saya Muhammad Nuradib bercita-cita ingin menjadi seorang doktor apabila besar nanti. Dari kecil anak saya disahkan menghidap penyakit jantung berlubang. Selama ini anak saya menjalani rawatan di Hospital Likas oleh Dr. Siva. Dr. Siva telah memberi cadangan kepada kami bahawa anak saya mempunyai peluang untuk menjalani pembedahan di Korea secara percuma pad 13/3/2016 yang lalu. Satu kumpulan doktor dari Korea ke Hospital Likas telah memberikan rawatan dan ECHO di Hospital tersebut. Di sana kami telah berjumpa dengan Dtk Eva dari Persatuan Tabung Pesakit Jantung Sabah dan telah memberikan penerangan dan maklumat yang banyak tentang Persatuan ini.

Pada 20/2/17 anak saya, saya ke Korea di bawa oleh Mrs. Lee. Anak saya telah berjaya menjalani pembedahan pada 22/2/17. di sini saya banyak berterima kasih kepada Mr. Back, Presiden Seong-An Heart Foundation yang telah memberi sumbangan dan membawa makanan yang banyak semasa kami berada di hospital.

Sebenarnya kami tidak mampu menampung kos pembedahan anak kami yang sangat tinggi kerana pendapatan yang tidak mengizinkan.

Oleh itu, saya berharap agar Persatuan ini dapat membantu lagi orang lain. Saya juga ingin mengucapkan ribuan terima kasih kepada Persatuan Tabung Peakit Sabah kerana telah membantu kami. Jika ada tersilap kata dan terkasar bahasa, saya ingin memohon maaf.

— Ibu Muhammad Nuradib (2017)

# MY STORY

## Mohd Nazri Otto

Date of Birth : 25th August 2013  
 Operated : June 2016

Address : Semporna  
 Diagnosis : VSD

Mudna Maulana, 33, who is accompanying her son, Mohd Nazri Otto, said that they travelled over 10 hours by bus to get to the city two days earlier.

"We are from Kg Lok Malalum at Pulau Bum-Bum which is five minutes boat ride away from Semporna," she said.

"My son was diagnosed with hole in the heart when he was smaller. He was often sickly at that time."

She added that Mohd Nazri's nails would sometimes become blue, especially during cold weather.

She was grateful that her son was selected to undergo the trip, and expressed that she experienced a mixture of happy, sad and scared feelings.

"But I asked around from other people whose children and they gave positive reviews. That calmed me a bit and I am hoping for the best," she said.

Meanwhile, they were indeed very grateful for the successful operation and they returned home on the 13th June 2016 after 13 days in Korea. Upon arrival at the KKIA at 12:10 a.m., she together with the other patients and excorts were received by family members, Mr. Lee and Datuk Eva Susau the Hon. the Secretary of the SOSHF and she thanked the SOSHF and the team involved.

## MY STORY

### James Stephen

Date of Birth : 6th October 1973      Address : Kota Belud  
Operated : January 1998

I was born on the 6th October 1973 in Kota Belud.

At the age of 3, when my mother brought me to accompany my brother for medical attention, they also examined me and confirmed that I have 3 holes in my heart as I was not feeling too well.

At the end of 1997, the doctor confirmed that I'm also having 'Heart Valve' problem, coupled with '2 big holes and another small one', it was indeed urgent that I need immediate Corrective Heart Surgery as my breathing was getting difficult. I had short of breath and less energy. My parents were short of funds and we sought the help of SOSHF for sponsorship for the cost of surgery.

In January 1998, I went to Singapore for operation. It was a successful operation. After the operation, I felt the difference and I lived a normal life like any teenager on my age.

Today, I am married with Jacqueline Anthony and together we have 5 lovely children aged 4 - 19 years old. I also practice a healthy diet and taking supplement to maintain my health without relying on medicines.

Thank you very much to the Society For The Sabah Heart Fund.

### Muhamad Zharif Bin Omar Shariff

Date of Birth : 1st September 200      Address : Kota Kinabalu  
Operated : Year 2007      Diagnosis : Moderate VSD

No parent ever wants to hear their newborn baby has a hole in his heart. We faced this difficult diagnosis when our son, Zharif, was found to have a congenital heart defect. He underwent a successful open-heart surgery 9 years ago at Sejong General Hospital in South Korea.

Today Zharif is a growing, active boy who just turned 15 years old. He loves to play basketball and badminton and receives his follow-up care at Likas Hospital.

We are glad and forever grateful to the Society For The Sabah Heart Fund, the doctors and nurses at Likas Hospital, Sejong General Hospital, Seong-An Heart Foundation and Korean Food For The Hungry International.

Thank you.
